- Large assortment of accessories available, e.g. hand straps, shoulder strap, pouch, M-Cases and quick release
- High level of personalisation possible to fit various application areas

SpacePole Vario™

Enable complete mobile potential
across multiple applications

SpacePole Vario - a lightweight and universal portable tablet sled that allows you engage with your customers using the full range of features that your tablet application offers

In a world where customer service is everything, tablet based applications are at the heart of delivering a successful enterprise mobility strategy. They play an intrinsic part in delivering information and services, whether that might be within an in-store customer engagement application, the supply chain or in a range of customer facing applications - in fact, wherever a company is doing business.

The SpacePole Vario tablet sled has the ability to enable those applications in a minimalist discreet form factor, which looks tough whilst adding little weight to the device itself. Designed for everyday use, the Vario sled allows access to all buttons and ports, which increases the range of applications that are applicable to this integration solution.

The SpacePole range of accessories, for the latest tablet generations, enables the mobile worker to operate in any location. Mix and match with various hand straps, shoulder straps and carrying pouches, giving you optimum performance no matter your location. Vario provides the best use of the device and ensure comfort and workplace ergonomics, whilst offering a variety of configurations for different devices to enable true mobility in your tablet use.

SpacePole Vario – where functionality meets simplicity
