

Emax label materials

The Emax brand for inkjet media offers a wide range of materials. The variety of face materials and adhesive types besides the mainstream Paper and PP offers great opportunity for new business. Bespoke applications in confection industry-, automotive-, interior design- (mattresses and carpet) only to name a few interesting specialized niche markets. Or what to think about gold and silver face materials, temper evident and of course several sustainable face materials.

Next to the standard program offered in the web shop, BlueStar offers the entire range of Emax materials and ensures access to a large array and potential of inkjet media!

Starting from just 1 roll you have easy access to the Emax standard program! BlueStar starts with around 50 stock items tailored for the different colorwork printers, which you take directly into your shopping cart.

Next to the stock items, there are around 30 different media types available to you that can be requested as special productions. You can use the "Special Make Template" to process requests for special productions.

Have we piqued your interest?

You can ask the BlueStar staff for further information.

To get started with Emax media, we would like to point out our introductory campaign. Order our sample sets now for free..
