Note Acceptor

# Your Solution for Secure Note Validation at any POS

The apg® Note Acceptor is designed to ensure safe and efficient bill validation and at the same time acts as a **secure storage for the validated notes.**

Equipped with advanced counterfeit detection technology and an interactive LED status display, the Note Acceptor empowers businesses to safeguard against fraudulent activity with ease. Compact dimensions and multiple fixing points enable hassle-free installation, while the stacker securely stores validated notes for added convenience and security for any POS.

Featuring support for Euros, Sterling, and US Dollars

The Note Acceptor can be used as a stand-alone product or easily integrated with smarttill®, apg®'s cash management solution.
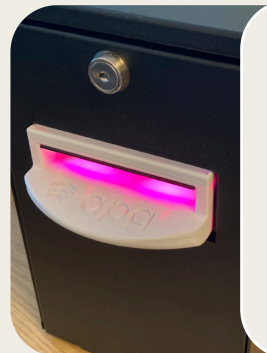

A simple plug-and-play with your POS software streamlines setup and operation, making the Note Acceptor a must-have addition to any cash-handling environment.

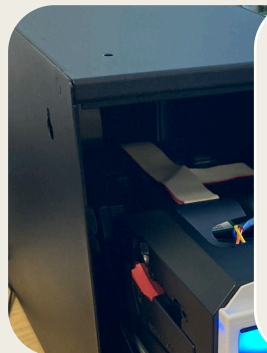

Lock random or alike

Secondary locking on the stacker box
